CIRCULAR

National Deworming Day - 10 February

Dear Students,

This is to inform you that **10th February** is observed as **National Deworming Day**. Deworming is essential to prevent intestinal worm infections, which can affect health, growth, and academic performance.

As per the guidelines received by CBSE circular CMO/6625-29/2025-26, students are advised to take a standard deworming tablet such as **Albendazole (400 mg)** or **Mebendazole (500 mg)** or **Zentel/Mebex Syrup**, which are commonly recommended for school-age children. The tablet should be taken **once every six months**, or as advised by a doctor.

Parents are requested to procure the medication from a medical store and ensure that it is taken under adult supervision.

Your cooperation in promoting health and well-being is appreciated.

Warm regards,

Principal
