

NCS MUN

The Model United Nations (MUN) conference held at Navy Children School, Chanakyapuri on 29–30 April 2026 witnessed enthusiastic participation and insightful deliberations. The single committee simulation of the United Nations Security Council (UNSC) focused on the highly significant agenda of the Middle East crisis and the resulting surge in global oil prices. Delegates engaged in intense discussions, presenting well-researched positions and proposing viable diplomatic solutions to address the geopolitical and economic challenges arising from the situation.

The crisis-based agenda highlighted the interconnectedness of international peace, security, and economic stability, making it a highly relevant and thought-provoking topic for young delegates. Such simulations help students understand real-world global issues, develop critical thinking, negotiation skills, and the ability to view conflicts from multiple perspectives. Kanishka of Class 10C was awarded for the Best Position Paper, receiving both a certificate and a trophy in recognition of her outstanding research and articulation. The MUN once again reinforced its importance as a platform for nurturing leadership, diplomacy, and global awareness among students.
