

SAFETY FIRST: PARENT AWARENESS WALK

EVENT: Safety Walk

DATE: 15 April 2026

A Safety Walk was conducted in the school on 15 April 2026 with the objective of creating awareness among parents about the various safety measures and protocols implemented on campus. The initiative aimed to familiarise parents with the school's commitment to ensuring a safe and secure learning environment for all students.

During the walk, parents were guided through key areas of the school and informed about important safety practices, emergency procedures, and precautionary measures followed within the premises. The activity provided an opportunity for meaningful interaction and reinforced the importance of collective responsibility in maintaining a culture of safety.

The programme was ably supported by Class XII students, **Amika Rustagi** and **Raavi Sehrawat**, who actively assisted in guiding parents and sharing relevant information throughout the walk. Their confidence, responsibility, and enthusiastic participation contributed significantly to the success of the initiative.

The Safety Walk served as a valuable platform for strengthening awareness, promoting preparedness, and fostering a shared commitment towards the well-being and safety of the entire school community.
