

## DISCOVERING THE WONDERS OF PLANTS

**ACTIVITY: A Nature Walk Full of Learning and Fun**

**DATE: 17 April 2026**

**CONDUCTED BY: Class III-B**

Class 3B embarked on an exciting and educational nature walk that provided students with a wonderful opportunity to explore and appreciate the beauty of their surroundings. The activity encouraged observation, curiosity, and hands-on learning beyond the classroom.

During the walk, students carefully examined a variety of plants and learned about their different parts, including roots, stems, leaves, flowers, and fruits. Through guided observation and discussion, they gained a better understanding of how plants grow and the important role they play in sustaining life on Earth.

The experience allowed students to connect classroom learning with the natural world, fostering a sense of appreciation and responsibility towards the environment. Their enthusiasm and eagerness to learn made the activity both engaging and memorable.

The nature walk was a joyful and enriching experience that deepened students' understanding of plants while inspiring them to value and protect the natural world around them.
