

A FUN INTRODUCTION TO ROBOTICS

ACTIVITY: Mini-Bot in Action

DATE: 23 April 2026

CONDUCTED BY: Class 1

Class 1 students had an exciting and memorable experience as they interacted with a mini bot during a special learning session. The young learners were fascinated to see the robot in action and eagerly observed its movements and responses.

One of the most captivating aspects of the demonstration was the robot's ability to display different facial expressions. The students watched with amazement as the robo face changed expressions, sparking curiosity, excitement, and plenty of smiles.

The activity provided an engaging introduction to the world of technology and robotics, encouraging students to explore how machines can interact and communicate. It also stimulated their imagination and inspired them to learn more about innovation and emerging technologies.

The session was filled with wonder, enthusiasm, and joyful learning, making it a delightful experience for all the students.
