

SOCIAL SCIENCE WEEK - DAY 4

ACTIVITY: SDG 6 Awareness Activity: Water Conservation

DATE: 23 April 2026

CONDUCTED BY: Classes VI-XII

As part of **Social Science Week – Day 4**, students participated in an awareness activity focused on **SDG 6: Clean Water and Sanitation**, one of the United Nations Sustainable Development Goals. The session aimed to highlight the importance of water conservation and encourage responsible use of this vital natural resource.

An informative video on water conservation was screened, helping students understand the growing challenges of water scarcity and the need for sustainable water management. The video emphasized practical measures that individuals can adopt to reduce water wastage and contribute to environmental sustainability.

Following the screening, students took part in a pledge-taking ceremony, committing themselves to using water responsibly and spreading awareness about conservation practices within their communities. The activity encouraged them to recognize their role in protecting natural resources and promoting sustainable living.

The session served as a meaningful learning experience, reinforcing the importance of conserving water for present and future generations. It inspired students to become responsible citizens and active contributors towards achieving a more sustainable and water-secure future.
