

SOCIAL SCIENCE WEEK - DAY 5 - EXHIBITION

EVENT: Social Science Exhibition on “Living Landscapes of India”

DATE: 24 April 2026

The culmination of **Social Science Week** was marked by a vibrant and informative exhibition titled “**Living Landscapes of India.**” The exhibition provided students with a unique platform to showcase their creativity, research skills, and understanding of India's diverse geographical and cultural heritage.

Students presented an impressive range of models, charts, maps, and displays depicting the varied physical features, climatic regions, cultural traditions, and lifestyles found across the country. Their exhibits reflected extensive research and thoughtful presentation, offering valuable insights into the rich diversity that defines India.

The exhibition transformed learning into an interactive and engaging experience, encouraging students to explore the interconnectedness of geography, culture, and human life. Visitors had the opportunity to appreciate the beauty and uniqueness of India’s landscapes while gaining a deeper understanding of the nation's natural and cultural wealth.

The event successfully fostered curiosity, creativity, and collaborative learning, while also enhancing students’ research, communication, and presentation skills. It served as a fitting conclusion to Social Science Week, celebrating India's remarkable diversity and inspiring students to take pride in their country's rich heritage.
