

COMPUTATIONAL MATHS IN ACTION

ACTIVITY: Solving Computational Maths

DATE: 30 April 2026

CONDUCTED BY: Class VIII-C

Students of Class 8C actively participated in a Computational Maths session, enthusiastically solving a variety of challenging questions and engaging in logical problem-solving activities. The classroom was filled with energy and curiosity as students applied mathematical concepts to analyze patterns, think critically, and arrive at solutions.

The activity encouraged learners to strengthen their computational skills while enhancing their reasoning, accuracy, and analytical thinking abilities. Through active participation and collaborative discussions, students explored different approaches to solving problems and gained confidence in their mathematical abilities.

The session promoted a hands-on and engaging learning environment where students were encouraged to think independently and develop effective problem-solving strategies. Their enthusiasm and determination reflected a genuine interest in learning and applying mathematical concepts.

The activity successfully fostered critical thinking, perseverance, and a positive attitude towards mathematics, making learning both meaningful and enjoyable.
