

BLENDING HISTORY WITH TECHNOLOGY

ACTIVITY: Exploring the Legacy of the Marathas

DATE: 10 July 2026

CONDUCTED BY: Class 8B

Students of Class 8B participated in an engaging **Social Science Scholastic Activity** based on the History lesson “**The Marathas.**” The activity began with an educational video that introduced students to the rise of the Maratha Kingdom and provided valuable insights into its historical significance.

Building on their understanding, students used **Chromebooks** to create informative PowerPoint presentations highlighting the contributions of prominent Maratha rulers and their role in the consolidation and expansion of the Maratha Empire. The activity encouraged learners to research, organise information, and present historical facts in a creative and meaningful manner.

By integrating technology with classroom learning, students enhanced their digital literacy while strengthening their historical knowledge, critical thinking, and presentation skills. The collaborative and hands-on approach made history more engaging and relevant.

The activity successfully combined historical inquiry with technological innovation, enabling students to develop a deeper appreciation of the Maratha legacy while fostering research, creativity, and effective communication.
