

FUN WITH PREPOSITIONS

ACTIVITY: Learning Prepositions Through Fun and Exploration

DATE: 10 July 2026

CONDUCTED BY: Class 2B

Students of Class 2B participated in an interactive English activity to learn **prepositions** through real-life experiences in the classroom. Using everyday objects and working with their classmates, they explored the meaning and usage of position words in an engaging and practical way.

Through hands-on demonstrations, students identified and understood prepositions such as **in front of, behind, beside, over, on, under**, and many more. By observing objects and interacting with their friends, they were able to relate these concepts to their surroundings, making learning meaningful and enjoyable.

To reinforce their understanding, students were assigned a **Google Classroom Practice Set**, enabling them to revise and apply the concepts independently through digital learning.

The activity made grammar both interactive and enjoyable, encouraging active participation, collaborative learning, and the development of strong language skills. It truly reflected the idea that **learning is more enjoyable when shared with friends**.
