

ART FOR THE ENVIRONMENT

ACTIVITY: Eco Club Initiative: Designing for a Greener Tomorrow

DATE: 1 July 2026

CONDUCTED BY: Class VIII

As part of the **Eco Club** initiative, students of Class VIII participated in a creative activity by designing an artistic catalogue highlighting the essential **do's and don'ts** for protecting the environment. The activity encouraged students to express their environmental awareness through art while reinforcing the importance of sustainable living.

Using vibrant illustrations, creative designs, and thought-provoking messages, students showcased simple yet impactful practices such as conserving water, reducing plastic consumption, planting trees, managing waste responsibly, and keeping the surroundings clean. Their artistic creations reflected a deep understanding of the need to protect natural resources and preserve the environment.

The activity fostered creativity, environmental consciousness, and a sense of responsibility among students. It also demonstrated how art can be an effective medium for communicating meaningful messages and inspiring positive action within the community.

The Eco Club initiative served as a valuable learning experience, motivating students to become environmentally responsible citizens and encouraging them to adopt sustainable practices for a cleaner, greener, and healthier future.
