

International Biodiversity Day

NAME OF THE EVENT: International Biodiversity Day

DATE: May 22, 2026

CONDUCTED BY: SCIENCE DEPARTMENT

On the occasion of International Biodiversity Day, 22 May 2026, ITL Public School led the awareness initiative that turned the global theme, “Acting Locally for Global Impact” into everyday action.

The initiative highlighted how small local actions like protecting nature, reducing waste, conserving resources, and promoting sustainability can create a positive global impact. The focus is on understanding the importance of biodiversity conservation, climate action, and environmental responsibility through Sustainable Development Goals (SDGs).

The observance serves as a reminder that protecting biodiversity is a shared responsibility for a greener and sustainable future. Students prepared posters and made videos to spread the message of protecting our environment

#BePartOfThePlan #ProtectBiodiversity #ForNatureForFuture
