

World Environment Day

NAME OF THE EVENT: World Environment Day

DATE: June 5, 2026

CONDUCTED BY: SCIENCE DEPARTMENT

“The Earth doesn’t need us to save it. It needs us to learn from it.”

This World Environment Day June 5, 2026, ITL Public School embraces the theme ‘Inspired by Nature. For Climate. For Our Future’ because protecting forests, water, and biodiversity is no longer a choice but a necessity for the air we breathe and the planet our children will inherit. From mini-forests and solar classrooms to zero-waste drives and water conservation, we are turning everyday actions into climate solutions, proving that when we act locally from our campus to our homes, we secure our global future. Students prepared posters and made videos to spread the message of protecting our environment

We are #GenerationRestoration🌍
