Dear Parents,

Greetings!

We are pleased to share an update regarding the AI Innovation Club.

As mentioned in the initial communication, the AI Innovation Club has been designed as a 40-hour programme. After careful planning and deliberation, these hours have been divided into smaller learning modules to ensure that students are able to understand, practice and apply the concepts effectively.

Since the number of working Saturdays in an academic year is limited, it is not possible to complete all 40 hours solely through Saturday sessions. Saturdays coinciding with term end examinations, festivals, school vacations, and other scheduled holidays cannot be utilised for club activities. Therefore, the sessions have been planned accordingly to ensure the successful completion of the programme.

The AI Innovation Club provides students with an excellent opportunity to acquire an additional future-ready skill in a structured and engaging manner.

As committed earlier, school transport will be available on the skeletal routes for students attending the club. Parents having any concerns regarding bus timings or routes are requested to contact the Transport Department directly.

We sincerely appreciate your cooperation and the extra effort you are making to enable your child to participate in this enriching programme. Your continued support and partnership are invaluable in ensuring the successful execution of the AI Innovation Club. We are confident that the programme will provide meaningful learning experiences and benefit all participating students.

Thank you for your continued trust and support.

Principal
