

CREATING NEW COLOURS THROUGH MIXING

ACTIVITY: Exploring Colours

DATE: 11 August 2026

CONDUCTED BY: Class 2B

Students of **Class 2B** participated in an engaging **Primary to Secondary Colours Activity**, exploring how new colours are created by mixing primary colours.

Students learned that **red, blue, and yellow** are primary colours and discovered that combining two primary colours produces secondary colours—**orange, green, and violet**. Through this hands-on activity, children experienced the joy of experimentation while developing a better understanding of colour mixing and artistic expression.

The activity made learning colourful, interactive, and fun!
