

Child Safety and POCSO Act, 2012 – Cyber Safety

School Level workshops are oftenly organised on “Child Safety and POCSO Act, 2012 – Cyber Safety” in our School . The programme aimed to create awareness among students and staff about child protection, the POCSO Act, 2012, and safe and responsible use of digital technology.

The workshops focus on cyber safety and responsible digital behaviour. Participants are sensitised about protecting personal information, passwords, photographs and other sensitive details while using the internet and social media. Awareness is also created about cyberbullying, fake profiles, online grooming, phishing, inappropriate content and unsafe online communication.

The workshops highlight the importance of the POCSO Act, 2012 in protecting children from sexual offences and ensuring a safe and child-friendly environment. Students are encouraged to immediately approach parents, teachers or other trusted adults if they encounter any unsafe or uncomfortable situation, either online or offline.

The workshops are interactive and informative, and students actively participate in discussions and awareness activities. They learn practical ways to identify online risks, maintain privacy and respond responsibly to cyber-related situations.

Students are encouraged to practise safe digital habits and contribute towards creating a secure, respectful and child-friendly school environment. The workshops successfully enhanced awareness about child safety, POCSO Act, 2012 and cyber safety. They empowered students with essential knowledge and encouraged them to use digital platforms safely, responsibly and confidently.
