Name of the Activity : **Workshop on Career Counselling**
Day & Date : **Tuesday, 22 September, 2026**
Speaker : **Ms Kavya Sharma & Ms Shrishti**
Venue : **School Auditorium**

A Glimpse of the Event

“Start by doing what is necessary, then what is possible, and suddenly you are doing the impossible.”

Objective

The workshop aimed to help students develop self-awareness and understand the factors that are important for making informed career choices.

A Career Counselling Workshop was organised for the students of Classes IX and X at MBS International School, Sector 11, Dwarka, New Delhi, with the objective of creating awareness about self-assessment, aptitude, interests and informed career planning. The session was conducted through an interactive PPT presentation covering psychometric tests and aptitude tests, their purpose, significance and role in understanding students' abilities, interests and career preferences.

Students actively participated in various activities designed to help them identify and reflect upon their strengths, areas of improvement and interests. These activities encouraged students to develop greater self-awareness and understand themselves better before making future academic and career decisions. The session was interactive and engaging, with students enthusiastically participating in the activities, asking questions and sharing their doubts regarding career choices, assessments and future opportunities. Their queries were addressed and clarified by the facilitators.

The workshop helped students understand the importance of self-awareness, aptitude and personal interests in career planning. It encouraged them to explore different career options based on their individual abilities, interests and preferences. The Career Counselling Workshop was successfully conducted and received a positive response from the students. The combination of PPT-based learning, interactive activities and discussions made the session informative, engaging and relevant, providing students with valuable insights into understanding themselves better and making informed decisions about their future academic and career pathways.
