REIMAGINE, REPURPOSE, RECYCLE!

ACTIVITY: E-Waste Art Installation – Creativity for a Greener Tomorrow
DATE: 14 October 2026
CONDUCTED BY: Eco-Club

The Eco Club organised an **E-Waste Art Installation** to promote environmental sustainability and responsible disposal of electronic waste. Students creatively transformed discarded electronic items into artistic installations, highlighting the importance of the **3Rs – Reduce, Reuse and Recycle**.

The initiative encouraged students to rethink waste, explore creative ways of repurposing materials, and adopt eco-friendly practices. It beautifully combined artistic expression with environmental awareness, reinforcing the message that small steps can contribute to a greener and more sustainable future.
