A Glimpse of the Event

The **Emergency Response Relay for Grade VII** was successfully conducted on Thursday, 22 October 2026, in the school premises of MBS International School. The activity was organized to instill essential life -saving skills, develop critical hazard assessment capabilities, and empower students to handle unexpected health and safety crises effectively.

Students participated individually in a dynamic relay setup, where each speaker was tasked with assessing a specific medical or environmental emergency scenario. The participants systematically analysed their designated situations and verbally outlined structural management procedures. The situations addressed during the event encompassed a comprehensive range of critical everyday incidents.

The young learners demonstrated exceptional presence of mind, articulating accurate immediate procedures, hazard mitigation techniques, and relevant local emergency hotlines. They showcased clear vocal proficiency, communication skills, and structured problem-solving while demonstrating how acting responsibly can prevent a minor incident from escalating into a severe disaster.

The activity concluded with a short reflective summary emphasizing empathy, alertness, and proactive communal assistance. Through these individual presentations, students connected academic concepts with vital life skills, gained practical public speaking confidence, and developed a profound sense of responsibility. The event proved to be an incredibly engaging, instructive, an d enriching learning experience for everyone involved.
