A Glimpse of the Event

A Peer Teaching Activity was organised on Wednesday, 28 October 2026, in the school premises with the objective of promoting collaborative learning, effective communication and conceptual understanding among students. The activity provided students with an opportunity to experience the role of both teachers and learners.

Selected students enthusiastically participated and took responsibility for explaining specific topics to their classmates. They prepared their content in advance and presented it using simple explanations, relevant examples, diagrams and teaching aids. The student-teachers encouraged their peers to ask questions, clarify doubts and actively participate in discussions.

The activity created an interactive and student-centred learning environment where students learned from one another. It also helped develop confidence, leadership qualities, public-speaking skills and teamwork. The participating students demonstrated responsibility, subject knowledge and creativity while explaining their assigned topics.

The session concluded with a brief feedback and discussion round in which students shared their learning experiences. Overall, the activity was conducted successfully and proved to be an engaging and meaningful learning experience. It strengthened peer interaction, encouraged independent learning and reinforced the concept of learning through collaboration.
