CAN PLANTS GROW WITHOUT SOIL? - EXPLORING NATURE

EVENT: Discovering Soilless Plant Growth
DATE: 4 November 2026
CONDUCTED BY: Class 3B

The students of Class III-B explored an interesting question: *"Can tiny plants grow without soil?"* Through a fun-filled, hands-on activity, they discovered that certain plants can grow without soil when provided with essential requirements such as water, sunlight and air.

The activity encouraged curiosity, observation and scientific thinking while helping young learners develop a deeper appreciation for nature. It was an engaging experiential learning experience filled with discovery and excitement!
