

Science Week Report

Science Week at DPS Maruti Kunj was a remarkable celebration of curiosity, creativity and scientific exploration. Designed to make learning engaging and interactive, the week was filled with hands-on experiments, innovative projects and thrilling competitions that brought science to life for students.

The event commenced with an inspiring opening ceremony, where Principal Sir, Mr. Akhilesh Chandra Chaturvedi, encouraged students to dive into the fascinating world of science. Throughout the week, students participated in various workshops and activities that enhanced their understanding of fundamental scientific concepts. The Physics Fun workshop allowed students to explore the properties of magnets through interactive experiments, while Chemical Reactions in Action introduced them to intriguing phenomena like revealing secret messages using phenolphthalein and colourful acid-base reactions.

One of the major highlights was *The Little Scientist – Project Making & Presentation* , where students showcased impressive working models on topics such as Rainwater Detectors, Newton's Disc, the Human Heart, Wastewater Treatment Plants, and Solar-Powered Cars. These projects demonstrated their ability to apply theoretical knowledge to real-world problems, fostering creativity, teamwork and analytical thinking.

The excitement continued with the Inter-House Science Quiz, a thrilling contest that tested students' knowledge of biodiversity and general science. Creativity took center stage in the Poster Making and Slogan Writing Competition, where students illustrated the role of technology in shaping the future.

Science Week was a resounding success, leaving students inspired and eager to explore the wonders of science beyond the classroom. The event not only reinforced their learning but also nurtured a deeper passion for discovery and innovation. With such enthusiasm and participation, we eagerly look forward to another exciting edition next year!
