

The class assembly on the topic “The Effect of Social Media” was held on 8 May 2025 by the students of IX-D with the aim of enlightening students about the influence of social media in our lives—both positive and negative.

The assembly began with the thought of the day , which was having a very valuable perspective. It briefly explained the importance of the topic in today's digital age. This was followed by a thought-provoking Article highlighting how social media has transformed communication, learning, and connectivity across the globe.

A student presented the word of the day : Addiction which was very closely related to the topic and supported the topic really well, depicting the addiction that students get by using excessive use of social media.

A well-prepared skit was then performed by students of Class IX-D , depicting a scenario in which excessive use of social media led to poor academic performance. The skit concluded with a powerful message about maintaining a healthy balance between online and academic life.

The assembly ended with a motivating speech by our respected Principal, who emphasized the importance of being mindful digital citizens and encouraged students to use social media as a tool for learning, expression, and positive change.

Overall, the assembly was both educational and impactful, leaving the audience with valuable insights and a greater awareness of how social media shapes our behavior and choices.
